CMS109v3;

This certified product-version requires additional costs, contractual obligations and technical and practical limitations as described below:

eBluCare offers both a standard Electronic Health Records system that does not offer the capabilities needed to meet the objectives of the EHR Incentive Program, and an add-on “Meaningful Use Option” (MUO) that supplements the standard EHR with capabilities for needed to meet the objectives of the EHR Incentive program. The eBluCare EHR with the added MUO is the electronic health record technology that has been tested and certified as a complete EHR. eBluCare charges a one-time fee for the MUO. In addition to the one-time MUO fee, eBluCare charges a recurring monthly fee per provider who is participating in the EHR Incentive Program. eBluCare licensees are required to sign an agreement when purchasing the MUO, which specifies these fees.

The term of the agreement is for the duration of the providers’ participation in the EHR Incentive program. eBluCare also requires that licensees participating in the EHR Incentive Program purchase and maintain an annual service agreement subscription so as to receive necessary updates and assistance.

The one-time and recurring fees cover all features and capabilities which are not included in the standard eBluCare EHR for the specific purpose of meeting the objectives of the EHR Incentive Program including, but not limited to; CPOE, drug-drug and drug-allergy interaction checks, clinical decision support, reporting of clinical quality measures to CMS, generation and transmission of permissible prescriptions electronically, timely provision of electronic copies of patient health information with the ability to view

online, download and transmit, provision of clinical summaries for each visit, drug formulary checks, medication reconciliation, incorporation of clinical lab test results, submission of electronic data to immunization registries, submission of syndromic surveillance data to public health agencies, secure patient-provider messaging, incorporation of imaging and imaging results and electronic transmission of summary of care records upon transition of patients to another provider of care.

Limitations

EHR Incentive Program objectives cannot be met with the standard eBluCare. Meaningful Use can only be achieved with the add-on purchase of the eBluCare Meaningful Use Option. eBluCare licensees are required to maintain annual service agreements and upon expiration, many functionality required for achieving Meaningful Use are disabled. The certified eBluCare EHR product requires an internet connection to perform many required tasks and for licensing verification.

Third Parties

The certified eBluCare product is dependent upon third parties for some capabilities. These third parties are Change Healthcare (formerly Emdeon) for electronic prescribing, drug interaction and formulary checks and other functions and EMR Direct is utilized to facilitate Direct Messaging. eBluCare licensees may not choose alternatives to these third parties and are not required to enter into separate agreements with the third parties

Disclosure

The preceding mandatory disclosure language will be displayed on the eBluCare website at the following location: <http://www.eblucare.com/product-disclosure-agreement.pdf>

We agree to notify Drummond Group of any and all future changes to our transparency and disclosures language for this certified product-version.

We understand and agree that the ONC Health IT Certification Program Final Rule statement gives Drummond Group, as an ONC-ACB, the sole responsibility for ensuring compliance and determining appropriate consequences if EHR technology developers fail to divulge accurate transparency and disclosures information.

We understand and agree that we will provide to Drummond Group copies of or give access to any and all websites, marketing materials, communication statements, and other assertions made by your organization regarding the ONC certification status of this product in a reasonable time to ensure the transparency and disclosures information is being accurately disclosed.
